Blues Blues (In English, ballad, and variants) is a song or instrumental work in a vocal style, in which the poet or singer engages the listener in moods of grief and longing. The style of blues, popular in the United States since the 1920s, originated as a musical response to the social and economic changes of the late 19th and early 20th centuries, and it influenced the work of a generation of jazz musicians who were unable to assimilate the optimism of the early 20th century. History Blues was an early form of American popular music, originating in the black communities of the South, where it was sung as a form of black spirituals. Its roots can be traced to the work of the minstrel stage performers, who often developed topical songs in an attempt to be more progressive and literate than their white counterparts. Its roots can also be traced to the early traditions of the folk songs of the African-American folk music of the Deep South, where it was performed and taught by slaves. Blues originally had a bluegrass-like sound, but in the early twentieth century the most famous and influential blues singer, Bessie Smith, created a distinctively urbanized, sophisticated and highly emotive style. Popular interest in blues as a form began to rise in the 1920s, and its more urbanized, sophisticated, and widely embraced appeal by the middle classes led to the popularization of its music. In the 1930s, blues was adapted as a jazz style, and in the 1940s and 1950s, it became an important form of popular music, recorded and performed by jazz musicians including Charlie Parker and Miles

Davis, and the bebop styles of the 1950s and 1960s. The term is often used to refer to the form of this music played by jazz musicians, although it is most frequently associated with the blues and related styles.
