The authors describe a way of using the algebra of Clifford numbers to solve an important class of problems in ordinary and special functions. Also, there is an Appendix of two sets of exercises for physics and mathematics problems. 'Algebraic theory of functions of Clifford variable' contains 10 chapters devoted to the theory of Clifford algebra and applications of this theory to algebraic and analytic functions, Fourier series, integral equations, integral transforms of spectral type, differential equations, multi-dimensional non-linear eigenvalue problems and construction of the complete set of orthogonal functions on the standard simplex. Fourier Transforms, Integral Transforms, special functions, Non-linear Eigenvalue Problems, Clifford Algebra – problems from the Proceedings of the International Workshop on Clifford Algebra and its Applications, Moscow, 1991, held at the Institute of Mathematics of NAS of Ukraine.
