Create lists, keep track of your books, and sync across your devices. With the software, you can manage, download, and download Instagram accounts with just a few clicks. The mobile app allows users to check their Instagram account on their.Q: php: using preg_replace to strip a special character This is my code to strip special characters from a string: \$raw = ' Nummer:122 | Naam:John Doe | BB:444444 | Land:USA '; \$regex = '/(?:[^\]+)(?:[]+|^)+/s'; \$p = preg_replace(\$regex, "", \$raw); The current code removes spaces and line breaks from the string. How can I add the preg_replace to strip the special characters: (| @ *? " \ -) A: The \w, \W and \s\W sequences mean what you are trying to do isn't possible. The only way you can make this work is if your data is guaranteed not to contain the characters you want to remove: \$raw = ' Nummer:122 | Naam:John Doe | BB:444444 | Land:USA '; \$p = preg_replace('/^[^\w@\\s-]*/', "", \$raw); Note that if you remove the ^ from that regular expression then it will match any instance of [^...] where... is a space or a dash. You could add that ^ back in if you need to
