Displaying 1 of 10 comments. Looks great! It's always good to have a lightweight program that can handle what you want without getting in your way. I just wish the interface would look a little more modern and less clunky, but then I'm old enough to have gone through the 98-2000 look and feel that it still has a ways to go. I've been using it for quite a few years now, I have to say that it's been one of the best tools I've ever used. It does exactly what it's supposed to do and it's much faster than you can expect. It's not bloated and it also has a web interface, so you can grab the info directly from the internet. At first I wanted to take it for a toss, but after I'd tried it I kept coming back to it again and again. You're always free to try something new or go for a paid solution, but there's no doubt that this one is worth a shot.
